

This test file is based on a.tex¹ by x19290.

SOLVED: bad folding and not slanted problems are common in pLaTeX and LuaTeX-ja.

The cause of the latter problem is that Japanese fonts don't have italic shape by default. In this document, we define them by

```
1 \DeclareFontShape{JY3}{mc}{m}{sl}{<-> s * [0.92489]
   psft:Ryumin-Light:jfm=ujis;slant=0.167}{}
2 \DeclareFontShape{JY3}{mc}{m}{it}{<-> ssub* mc/m/sl}{}

```

¹This can be downloaded from <https://gist.github.com/1574793>.

SOLVED: LuaTeX-ja specific problem: when the *begin* line of a listings environment ends with JAchar, the first line of the listing is not rendered.

ex 1: problem; shebang not rendered --- 問題

```
1 #!/bin/bash  
2 :
```

え!1 あ, い・あ) う (ええ!2 あ	1 え!1 あ, い・あ) う (え
	2 え!2 あ

```
1 え!1 あ, い・あ) う (え  
2 え!2 あ
```

```
1 え!1 あアウイ  
2 え!2 あ
```

Ticket #29604

ギリシャ文字欧文扱い
